

# Hope to 100

**About the Game:** This floor game has 100 (10X10) blocks marked from 1 to 100 and one cubical dice. Each block is coloured randomly and 10 different colours are used. Each colour corresponds to a set of 10 cards with a distincy math question/instruction.

**Players:** A maximum of 10 players can play this together. Every player plays for himself/herself.

**Objective:** The first player to reach 100 wins.

**Movement:**

1. Players take turns to roll the dice.
2. The first player rolls the dice and moves forward according to the number on displayed on the top of the dice.
3. They then randomly withdraw a card from the deck of cards which are of the same color as the square they are standing on.
4. After that they answer the question on the card and move according to the instructions mentioned on the card. If they answer incorrectly, they are not allowed to move.
5. This completes one ACT and then the next player rolls the dice and so on.
